EXAMINING THE CONNECTION BETWEEN LIBRARY RATIOS AND LIBQUAL+ RESULTS

Poster produced and published by Jacob Tompkins, Dr. Jesse Klein, Kirsten Kinsley, and Michael Meth: Florida State University, Tallahassee, FL 32306

PRELIMINARY FINDINGS

CONCLUSION
When analyzed side by side, a general trend can be seen across each group of users. Institutions with lower ratios typically show higher LibQUAL responses for the selected affect of service categories. The more librarians you have working in an academic library, the likelier your students will be pleased with these aspects of library service!
